

Assessment and Management of Cardiovascular Risk

Master Robert Hotel
Hounslow, Middlesex

24th May 2010

This course will challenge you to explore the risk factors associated with Cardiovascular Disease and strategies that can be employed in the management and reduction of cardiac risk.

A broad range of approaches that are applicable to primary and secondary care will be discussed and will be supported by the latest evidence.

The course uses a range of clinical scenarios and other interactive activities to reinforce the essential theoretical knowledge.

***Assessment and Management of Cardiovascular risk* was designed with qualified nurses in mind and will appeal to nurses working in both primary and secondary care settings.**

This is a one-day course that runs from 9.30am to 4.30pm

Course content:
