

ECG Interpretation Workshop

Old Deer Park, Richmond-upon-Thames, Surrey

30th & 31st March 2010

This popular two day course is for people who are looking for a comprehensive grounding in ECG analysis and covers all of the common ECG abnormalities.

There are no assumptions made about prior knowledge or skill and the learner is guided through basic concepts and then building up to a wide range of ECG features and clinical applications.

The course is theoretical in nature but uses a range of activities to familiarise the learner with the knowledge that underpins the skill.

"I have learned more about the ECG in these two days than I could have imagined"
Staff Nurse ICU

The course is delivered by an expert in ECG who is also the Co-author of
"The ECG Workbook"

12 hours CPD
