ECG Update

9th March 2010
Hounslow,
Middlesex

This is a refresher course for those that have some skills and knowledge of ECG or have attended the ECG Workshop in the past. Opportunity is given to practice and further develop your existing skills.

Clinical scenarios are used throughout the day to make links between the theory and practice of ECG interpretation across a range of clinical environments.

The content is guided by those attending. Common topics covered are:

- Fascicular blocks
- VT vs SVT with aberrancy
- AV nodal tachycardia / AV nodal re-entry tachycardia
- Paced rhythms
- Bundle Branch Blocks
- Pre-excitation syndromes

£75 per person

Includes course materials, individualised certificate of attendance, refreshments and lunch.

Diabetes Update

12th March 2010
Shepherd's Bush
London W12

This course is for General Practitioners, Practice Nurses and other healthcare professionals who manage the care of the diabetic patient. The aim of this course is for you to develop up-to-date skills and knowledge in diabetes management.

Course Content:

- Historical perspectives on diabetes
- New diagnostic categorisation of diabetes 1,2,3,4
- Insulin v OHA
- Dietary management
- Sick day rules
- Current policies and guidelines
- National Service Framework
- Feedback from the BDA conference 2010

£75 per person

Includes course materials, certificate of attendance, lunch and refreshments

Welcome to our Spring course catalogue

In 2010 we will be hosting a number of clinical education events for healthcare professionals of all backgrounds. This catalogue is a supplement to our website:

www.charterededucation.co.uk

On the website you will find more information on the courses listed here, and you will also be able to use our secure online booking system.

Our course list is frequently updated, so please come to the website to register for updates on new courses.

Onsite Training Events

The courses listed here are our own scheduled events. But, should you wish to host one of these (or another of the courses listed on the website) then please contact us to discuss your needs and for a no-obligation quotation.

Onsite training is a cost-effective way of training a small or large number of staff at a location that is convenient to you and your team.

About Our Courses

All of our courses are presented by clinical experts in their fields who are also qualified educators. Many of our educators are university lecturers with a passion for their subjects.

We evaluate all our courses and receive outstanding feedback from those attending and commissioning our courses.

ECG Courses

Assessment and Management of Cardiovascular Risk

Hounslow, Middlesex
24th may 2010

Primary and secondary prevention strategies rely on an accurate assessment of cardiovascular risk. In this one-day course, the current guidelines for practice and evidence base will be applied to a number of clinical scenarios.

This course is aimed primarily at nurses working in primary or secondary care who want to develop a deeper understanding of what constitutes risk, how lifestyle modification strategies influence risk, and what current evidence and guidelines suggest.

Content includes-

- Understanding CVD risk factors
- Current guidelines for practice
- Lifestyle modification strategies
- Developing strategies to reduce CV risk.

£68 per person

Includes Individualised Certificate, refreshments and lunch.

Management of Hypertension

Hounslow, Middlesex
26th April 2010

This course takes an evidence-based perspective on the current management guidelines for Hypertension. The course is suitable for any nurse from primary or secondary care, who wishes to develop a deeper understanding of this important area of practice.

Throughout the day you will use clinical case studies to support the theoretical content of the course.

Content includes-

- Anatomy and Physiology of hypertension.
- Current guidelines for practice (NICE, BHS).
- Pharmacological therapies
- Non-pharmacological therapies
- Risk assessment in hypertension
- Lifestyle modification

£68 per person

Includes Individualised Certificate, refreshments and lunch.

ECG Interpretation Workshop

Richmond-upon-Thames, Surrey
30th & 31st March 2010

This is our comprehensive and intensive ECG interpretation course that has now been delivered to hundreds of healthcare staff in the UK over the last 2 years. Evaluation has repeatedly shown that this course is an invaluable way to develop your ECG interpretation Skills. No prior experience is required as this two-day event will give you all of the knowledge and confidence that you need.

A systematic approach to ECG interpretation is used that builds up your knowledge quickly.
